Short Description

FootActive Medical ¾ Length are our highest density insoles. They offer a high degree of arch support and deep heel cup.

These insoles are suitable for people with severe over-pronation or flat feet

¾ length insoles can fit into most types footwear (even those with a narrower toe)

Description

- **TOP QUALITY NHS-APPROVED ¾-LENGTH ORTHOTIC INSOLE** - The preferred choice of orthotic insole for Podiatrists and Physiotherapists, FootActive Medical Insoles assist with the effective treatment and relief of Heel Pain, Heel Spurs, Plantar Fasciitis and Achilles Tendonitis.
- **ADVANCED DESIGN HELPS TO REDUCE PAIN AND INCREASE COMFORT LEVELS** - FootActive Medical Insoles feature a soft velours top cover, biomechanical arch support and a deep heel cup for re-aligning foot and ankle, and can be used to correct over-pronation (inward rolling of the ankle/foot), flat feet and fallen arches.
- **MADE WITH PREMIUM MATERIALS FOR EFFECTIVE AND NOTICEABLE RESULTS** - Developed using top quality, high density lightweight EVA with advanced cushioning Durapontex and shock absorbing heel padding with microfibre top layer, these insoles offer wearers the benefit of long-lasting durability and unrivalled comfort levels.

- **SUITABLE FOR MOST LACE-UP FOOTWEAR** - FootActive Medical $\frac{3}{4}$ -length orthotic insoles are highly versatile and are suitable for use with all lace-up footwear including trainers, walking boots, and work boots.
- **100% CUSTOMER SATISFACTION GUARANTEE** - FootActive Medical Insoles are proven to help reduce pain and increase comfort when walking and standing. This guarantee is backed by our 30-day refund or exchange policy, giving you total peace of mind when making your purchase today.
