Price: £7.99

Short Description

Cranberry is a popular source of proanthocyanidins (OPCs) but fresh cranberries are bitter cranberry juice is often more sugary than fizzy pop! For an easy way to work Cranberry into your day, each Lindens Cranberry Juice 5000mg Tablet contains a concentrated extract of cranberry juice equivalent to 5000mg juice.

Description

- Easiest way to work cranberry into your day
- Rich in polyphenols and antioxidants
- Particularly popular with women
- Convenient easy swallow tablet

Cranberries (vaccinium macrocarpon) are tart, bitter red berries that grow throughout the world. Traditionally used for centuries, modern analysis has shown that cranberries are a rich source of polyphenols such as proanthocyanidins (OPCs), which are powerful antioxidants, making them a popular health food. However, fresh cranberries are tart and bitter, and cranberry juice is often flavoured with so much sugar to counteract the tartness that it can be more sugary than fizzy pop!

For a much less sugary and much more convenient way of working cranberry into your day, try Lindens Cranberry 5000mg Tablets. Each tablet contains a concentrated extract of cranberry juice equivalent to 5000mg juice, providing all the polyphenols with none of the added sugar or inconvenience of other cranberry products, all in a convenient, easy-

swallow tablet.
